PROJECT
CALIFORNIA MARKETING
https://qasvus.wixsite.com/ca-marketing

TEST SCENARIO

Scenario 1: User can make a registration on a website and create account.

Scenario Description

New user wants to register and create account on our website.

The following scripts will cover this scenario:

1.1 Open our website in browser and find our logo to be sure it is right website

1.2 Try to make a registration by using all suggested ways:
- "Sign up with Facebook"
- "Sign up with Google"
- "Sign up with Email"

Script 1: Verify that user can reach our website
https://qasvus.wixsite.com/ca-marketing

Script Description

The new user wants to reach our website in his browser

Setup

Guidance documents must be loaded.

Script Steps

Step #	Test ID	Action	ExpectTested Results	Pass/ Fail
1	001	Verify that website https://qasvus.wixsite.com/ca-marketing can be reached by user in Chrome browser	User should be able to see California Marketing website's Logo	Pass

Test Execution

Date/Time	Tester	Test ID	Test Phase	Status
11/25/2020	Kristina Tablev	001		Pass

Script 2: **Check "Sign Up" functionality**

Script Description

2.1 New user wants to make a registration using "Sign up" with Facebook

2.2 New user wants to make a registration using "Sign up" with Google

2.3 New user wants to make a registration using "Sign up" with Email

Setup

Guidance document must be loaded

Script Steps

Step #	Test ID	Test Action	Expected Results	Pass/ Fail
1	002	Verify that user is able to make a registration with Facebook account	Registration is done successfully, user can go at his profile page	Pass
2	003	Verify that user is able to make a registration with Google account	Registration is done successfully, user can go at his profile page	Pass
3	004	Verify that user is able to make a registration with valid Email address and password	Registration is done successfully, user can go at his profile page	Pass

Test Execution

Date/Time	Tester	Test ID	Test Phase	Status
11/25/2020	Kristina Tablev (KT)	002		Pass
11/25/2020	KT	003		Pass
11/25/2020	KT	004		Pass

Script 3: Check the functionality of password field by Boundary Testing and Equivalence Partitioning Test when using the "Sign Up with Email" function.

Script Description

New user wants to make a registration by using his valid email and creating a password.

Setup

Guidance document must be loaded

Preconditions: According to requirement (BR#005) from project documentation the Password field is able to accept from 5 to 8 (including) characters (latin capital and lowercase letters, numbers, symbols, special characters, punctuation marks).

3.1 Check the functionality of password field by Boundary Testing:

Script Steps

Step #	Test ID	Test Action	Expected Results	Pass/ Fail
1	005	Verify that user is unable to make a registration by using valid Email and any *4 numbers* in password field	Error message "Please use from 5 to 8 characters"	Pass
2	006	Verify that user is able to make a registration by using valid Email and any **5 numbers** in password field	Registration is done successfully	Pass
3	007	Verify that user is able to make a registration by using valid Email and any *6 numbers* in password field	Registration is done successfully	Pass
4	008	Verify that user is able to make a registration by using valid Email and any *7 numbers* in password field	Registration is done successfully	Pass
5	009	Verify that user is able to make a registration by using valid Email and any **8 numbers** in password field	Registration is done successfully	Pass
6	010	Verify that user is unable to make a registration by using valid Email and any *9 numbers in* password field	Error message "Please use from 5 to 8 characters"	Pass

3.1 Check the functionality of password field by Equivalence Partitioning Testing:

Script Steps

Step #	Test ID	Test Action	Expected Results	Pass/ Fail
1	011	Verify that user is unable to make a registration by using valid Email and *As5? characters* in password field	Error message "Please use from 5 to 8 characters"	Pass
2	012	Verify that user is able to make a registration by using valid Email and *As5?@ characters* in password field	Registration is done successfully	Pass
3	013	Verify that user is able to make a registration by using valid Email and *AAAAAA characters* in password field	Registration is done successfully	Pass
4	014	Verify that user is able to make a registration by using valid Email and *As5?@As characters* in password field	Registration is done successfully	Pass
5	015	Verify that user is able to make a registration by using valid Email and *&&&&&&& characters* in password field	Registration is done successfully	Pass
6	016	Verify that the user is unable to make a registration by using valid Email and **As5?@As5?** *characters* in password field	Error message "Please use from 5 to 8 characters"	Pass

Tests Execution:

Date/Time	Tester	Test ID	Test Phase	Status
11/26/2020	KT	005		Pass
11/26/2020	KT	006		Pass
11/26/2020	KT	007		Pass
11/26/2020	KT	008		Pass
11/26/2020	KT	009		Pass
11/26/2020	KT	010		Pass
11/26/2020	KT	011		Pass
11/26/2020	KT	012		Pass
11/26/2020	KT	013		Pass
11/26/2020	KT	014		Pass
11/26/2020	KT	015		Pass
11/26/2020	KT	016		Pass
